➤ Projects	<u>TechGupShupwithFatima</u>
⚙ Done	In progress

Introduction

1. Who is Ahmed Tariq?
2. How did your journey Started?

Introduction to DevOps

1. For those who are new to the concept, could you briefly explain what DevOps is and why it's become so critical in the tech world?
2. In your experience, what are the most common misconceptions students or early professionals have about DevOps?

Learning DevOps

1. Many students hear about DevOps but are unsure where to start. What are the foundational skills or knowledge areas they should focus on to break into DevOps?
2. How important is coding for someone pursuing a career in DevOps? Can you give examples of when coding skills really matter?

Career & Opportunities

1. DevOps is a fast-growing field with a lot of career opportunities. What advice would you give students looking to transition from traditional development or operations roles into DevOps?

2. **From your experience, what makes someone stand out as a DevOps engineer, especially in entry-level positions or internships?**

Challenges & Problem-Solving

1. **What are some of the key challenges that organizations face when trying to implement DevOps, and how can students or junior professionals be part of the solution?**
2. **Can you share an instance where a DevOps approach really transformed a project, particularly in terms of collaboration and efficiency?**

Future of DevOps

1. **The tech landscape is always changing. What are some emerging trends in DevOps that students should be aware of to stay ahead in the field?**
2. **How do you see the role of DevOps evolving in the next 5–10 years, and what new skills do you think will be in demand?**

Practical & Student-Related

1. **Students often work on group projects that simulate real-world development. How can adopting a DevOps approach make collaboration more seamless in such scenarios?**
 2. **What's one DevOps tool or practice that you think is underappreciated, but every student should know about to gain a competitive edge?**
